[ ] Registered Child Development Home C1

[ ] Non Registered Child Care Homes accepting CCA

Program Population Served:

[ ] Infant(0<24 mos)

[X] Toddler

[X] PreSchool

[X] School Age

[ ] All Ages

1. Basic Overview

Trina Dockweiler has been providing childcare services for over 30 years. For the past four years, Bill Dockweiler has been her co-provider. When compliance staff arrived, the children had finished breakfast and they were playing with toys and a couple had tablets. One friend told compliance staff that her mom had been in Trina's childcare when she was little. The provider stated that there have been a few second generation attendees in their care. The childcare is located on the main level of the home. The care space is most of this floor. There were four children in care today. It was reported that two children were not in care on this date. The provider reported that they do not have a strict schedule while children are present. Most play within the home is child-led. Children have access to toys, activities and two providers who are like grandparents to everyone. The providers have a daily outside program. If it's not raining, they are outside for as long as they can be with the children. Compliance staff has visited this provider for several years and for most visits, the providers had the children outside playing.

CHILD CARE ANNUAL EVALUATION

2. Identify Observed Strengths Of The Program

Compliance staff observed the providers and children interacting. The children approached the providers with no reservation. Both providers assisted the children. One little friend has spent more time with Bill and will seek him out over Trina for assistance.

The providers are open to have children in care 24 hours a day. They work to be flexible with parents and the needs of each family. The providers do not go over eight children at any one time. This allows for the providers to give attention and time to the children in care.

3. Identify The Aspects That Fall Below The Standard

Each smoke detector is tested monthly, and a record is kept for inspection purposes.
Fire and tornado drills are practiced monthly and documentation kept on file for the current year and previous year.

**The providers did not have March or April 2026 documented when compliance staff saw the form. They are encouraged to start with the May dates they completed the drills and document monthly.

110.8 (4) b : Procedures are in place for :Evacuation to safely leave the facility, Relocation to a common, safe location after evacuation, Shelter-in-place to take immediate shelter where the child is when it is unsafe to leave that location due to the emergent issue, Lock down to protect children and providers from an external situation, Communication and reunification with families, Continuity of operations, and Procedures to address the needs of individual children, including those with functional or access needs.
For school aged children: An annual statement of health condition signed by the parent or legal guardian, annually from date of statement of health or admission physical.

**The providers were unable to locate their plan. We discussed what they have in their plan and they told compliance staff the steps they take monthly for drills. Compliance staff emailed a blank copy of the form for them to fill it out. Please return a copy by email or take pictures of the filled out form and text to 712-435-0576. This is due to be returned to compliance staff by July 29, 2026.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

The 2026 compliance measure was not met on the day of the visit. The providers were unable to locate their written Emergency Preparedness Plan.

Compliance staff also emailed a copy of the parent consent to treat form for school aged children who have a Kindergarten Physical on file.
