CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Jaci Wetzler has been providing childcare services for many years. She is a returning Category A childcare development home. She was previously registered in 2018 to 2020. At the time of the visit, the provider had five children in care. Two older children were playing with a floor puzzle and three younger children were sleeping at the time. The childcare is located on the main floor of the home. Napping rooms are on the top level of the home.

2. Identify Observed Strengths Of The Program

Compliance was able to observe the provider with two of the children during the visit. Compliance staff has no concerns with the observed interactions. We discussed her general practices for safe sleep, disciplinary measures and her general routine for the childcare day.

The provider believes in child led play. She has toy and activity options for children of all ages available during care hours. The outdoor play area has room to run and a play set for older children.

The provider reported that communication between herself and parents is important. She was actively contacting a parent regarding a feeding issue for one of the children.

3. Identify The Aspects That Fall Below The Standard

The provider is in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
