X	**FULL** license from 07-01-2022 to 07-01-2024
	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Nate Knepper **Date:** 06-19-2023

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

N/A.

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

An off-year visit was conducted on 6/16/23. Director, Jeanna Beeber, and the office manager, Lori Cirks, were present throughout the visit.

All areas of the program were observed. These areas observed consisted of classroom observations and activities, ratios, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review. The most recent COVID updates were also reviewed.

Kids Korner Two is owned by Lezlie Ellerman. Ms. Ellerman also owns Kids Korner in Dallas Center and oversees Kids Campus Dallas Center and Kids Campus Stuart. Jeanna Beeber is one director of this program and has been for a number of years. Emily Ellerman was added as a second director in 8/2021. Both individuals meet the requirements for director. Johanna Boots and Stacy Coffin are the on-site supervisors at this location. Both individuals meet the qualifications for on-site supervisors.

The center serves children ages six weeks old to roughly 12 years in age and utilizes the Creative Learning Curriculum with children as well as S.T.E.M. with school-age children. There are two levels to the center where classrooms are located. The center has a secure entrance and on the lower level of the building is where the main entrance is located. However, there is also a secure entrance on the upper level. Parents key in a code and guests have to ring a door bell to gain entrance.

There are a total of 10 classrooms. Some of these classrooms are used interchangeably with other classrooms.

During the visit, children were observed having tummy time in the infant room and having a diaper changed. In several of the other classrooms, children were napping on cots. School-age children were observed playing outside on one of the playgrounds. Staff were attentive to children and their activities.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

The center has three washers and dryers on site.

There is an office manager on-site.

There is a secure main entrance into the building. The main office is located in this area as well so staff are readily visible to parents/children upon arrival. There is also a secure entrance upstairs for school-age children.

The playground areas are very large and well shaded. A portion of the playground is also inspected annually by Rainbow Company.

The center has a garden on the playground.

The center shifts back and forth from a "winter food menu" to a "summer food menu" based on the seasons.

Monthly staff meetings are held either formally or informally.

The center has a website. The center also uses the Playground online application for better communication with parents.

The classrooms were nicely decorated and the center as a whole was very clean. Good child - staff interactions and activities were observed.

There is more structure and activities for school-age children related to STEM.

The center has good community partnerships.

The center is starting the process of IQ4K which is based on best practice and a voluntary program.

There are free vision screenings for children at the center.

The owner and director, Beeber, both have their NAC.

Over the past year, more renovations have taken place which has included interior painting and installing a new air purifier system.

There is a big emphasis on literacy for children at the center.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.10(3)c: For ongoing, long term medications, authorization shall be obtained for a period not to exceed the duration of prescription.
One child's food allergy action plan was not signed/dated by a parent nor the doctor.

109.12(4): Procedures are developed and implemented to maintain equipment and materials in a sanitary manner. Sanitary procedures are followed for use and storage of personal hygiene articles.
1. All infant bottles should be labeled to determine whose bottle it is.
2. Items not related to diapering should not be stored on the diapering/changing table.

V. SPECIAL NOTES/RECOMMENDATIONS:

Radon testing was last conducted 2/4/22 - 2/7/22. All classrooms came back with radon levels below the 4.0 cutoff. Because all classrooms came back below the 4.0 cutoff, radon testing can move to at least every five years. The next testing will be needed no later than 2/2027. If radon levels remain below 4.0, testing can remain at every five years. If radon levels are 4.0 or higher, retesting will be needed, a mitigation plan, and then the center would move back down to testing every two years at least temporarily.

The annual furnace inspection was last completed 11/28/22.

There are three functioning carbon monoxide detectors in the building.

For transportation and field trips, the center contracts with the school district if the field trip is not within walking distance. Children five years of age and older are eligible for field trips.

I-Power and IQ4K were discussed at the visit.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
